The following is the official report from Com-modore Sands, Superintendent of the Naval Ob-servatory, is regard to the recent meteoric show-or, received at the Navy Department this after-

or, received at the Navy Department this afternoon:

UNITED STATES NAVAL OBSERVATORY,

SIR: I have the honor to submit the following preliminary report of the meteoric shower
of this morning. During thevening of the ISM
inst. there were no greater number of meteors
to be seen than are manify observed on clear
nights, until about 11 p. m., when there seemed
to be an increase in numbers and brilliancy,
though not sufficient to indicate the beginning
of a shower. At midolght the number had considerably increased and the prevalence of trains
was generally noted. At 35 manutes past midoight the observing party, consisting of Prof.
Eastman and Meere. Harrisou, Frisby and Hays
began to count meteors and to plot the tracks
of the principal ones that appeared
in thit porilon of the leavens covered by the
star chart constructed at the observatory in 1867.
At one hour and thirty-five minutes a m, three
hundred meteors had been counted, most of
them quite brilliant, and nearly all of them teaving green, blue or red trains behind them. Thus
for the sky, but most of them were in the
northern and southern heavens, and scarcely any
lin a position to be piaced in the ear chart.
Many of the trains were visible several minutes,
and one leated ten minutes, and traces of one
near Ursa Minor was seen thirty minutes after

and one lasted ten minutes, and traces of one near Ursa Minor was seen ability minutes after the appearance of the meteor. After one how-and fitty minutes Prof. Fastinan assisted to noting the time of a portion of the priparyal meteors and enceceded in sketching the watch of about 90. During one hour and forty-three minutes four hindred but how counted and alterwards the successive buddeds were observed in the following meteors. [The intervals are here given by Commodore Sands.] The observations were continued north after six a m., in which time there had been counted five the issued and serenty-sight. At two hours and twenty minutes a m. Prof. Nores and sow joined the purity of observers and assisted in counting increase in the western heavens. During the whole display there were many meleors seen in the west, but from four o'clock to live the numbers were about could, in east and west.

The time of the maximum frequency was about tre hours, when they fell at the rate of about 2,000 per hour. The radiant point was quite well defined, during the latter end of the shower, and found by estimation to be about 148 degrees in right ascension, and 22 minutes thirty seconds in dreligation. The trains were unposally bril.

Very respectfully. your obedient servant,
B. F. Sanns,
Commodore and Superintendent.

Temportum t Decision.

Judge Clifford, in the United States Circuit Court, this morning delivered his opinion in the great Howland will case its which Hesty Robbson, now Mro. Edward fi. Green, was complainant against Thos. Landelt and others, executors under the last will of Siria Ann Howland, to have the will set aside. The whole case rested on the admission of the deposition of Mrs. Green, and this Court decided it inadmissable so far as related to a contract between her and Mrs. Howland. The bill of complaint was dismissed with coefs. An appeal to the Supreme Court was taken. Court was taken.

The Courier Journal publishes ito-morrow a private letter from Gen. Butter, in which he says:

"That we are politically opposed I think must arise, from the different tight in which we see the same things. The South has no firmer friend it has I say and ever have been. It is a part of my constry, and silhough i may misjudged in the best way to preserve the South from the consequence of what I must regard as a great criese and still more a blunder, yet I would do say; thing I could to be contineed that it would tend to the presperity, aglest and regeneration of the South. As a part of my constry I have no harred toward the South and Southern men as such, if I know my own heart, but I am opposed only to those who still war upon the best interests of the country as I understand them, and that opposition from the very necessities of my nature will be a stern and unyleiding one. I copo to see you, and assure you in person that I can be as ardent a friend in poace as I was a determined and unrelenting fee in war."

The Courier-Journal says of this: As a partian we have untiringly fired the hasviest guns in our battery at Gen. Sutter, but when he spors higher and demonstrates that his will is equal to his capacity for good, our genue shall all be spiked or turned upon those who may assail his acts on our behalf.

The Late David Tod.

The death of Ex-Gov. Ted of Ohio, announce by telegraph on Saturday, caused a feeling of sadues throughout the entire country. Of like distinguished patriotism and ability with Gov Andrew of Massachusetts, his decease breaks an Other link in the chain of "loyal Governors who so promptly and effectually performed their whole duty in the war for the Union, and whose memory will be long and foully cherished by grateful pation.

David Tod was the son of Hon. George Tod days one of its supreme judges. He was born in Youngstown in the year 1904, and was sixty-four years of age at the time of his duath. He studied haw with Russell Stone of Warren, and was admitted to the bar about 1826, going into partnership with Judge Burchard. It to his energy and capacity, in a great measure, that the building of the Mahoning railroad, and the development of the Mahoning valley coal region is stockholders in the Atlantic and Great Western Railway. By his various business enterprises hi accumulated a large fortune, while at the same time he has much advanced the interests of his city and the section of the State in which he

In politics, Governor Tod was, belore the war a Democrat of the straightest sect. He was elect Senator in 1840 by the Democratic party. In 1844 he was Democratic candidate for Governor, and was besten by Bartley, (Whig.) by 1,277 majority. In 1846 he was again a candidate, and was besten by 2,230 majority by Bebb, Whig. Under Fresident Polk he was appointed minister to Brazil and held that position under that administration. He was one of the Vice-Presidents of the Charleston Democratic Convention, and became its president on the split in the convention and the withdrawal of Caleb Cushing, presiding when Donglas was nominat-eafor the Presidency. On the breaking out of the war, however, he at once identified himself with the Union party, with which he has ever since acted. In 1801 he was elected by that party Governor of the State, by a majority of 55,208 over Hugh J. Jewett, Democrat. He served with remarkable patriotism, fidelity, honesty and abi lity through the two years or his term, rendering distinguished service to the country in his promptitude in ruleing, fitting out and forward ing regiments to the field. In 1864 he was offered the Secretaryship of the Treasury by Presi dent Lincoln, but declined it. During the Preaidential canvass the Governor has taken an active part. His name headed the Republican ticket for Presidential electors in Ohio, and his andden death shefore the meeting of the electoral college causes a vacancy, to be diled in the manner prescribed by law. Governor Tod leaves a wife, four sons and two

The Next Step Forward.

During the late carvase it was charged spon the Republican party that we enforced Negro suffrage, at the Bouth, but rejected it at the forth. The answer was that misvery was not a domestic institution at the North, and the Northern States had not joined in the rebellion. At the same time, it must be granted that there is a seeming inconsistency in such legislation out of which a plansible charge of insincerity can be directed against the Republican party it now devolves upon that party, sustained and placed in power by the sovereign people, to wakow its faith by its works," and to wips away this represent. And to accomplish this, the next Congress should submit to the States anothe Constitutional Amendment, conferring the right of suffrage for National purposes and officers such as Presidential and Congressional elections upon colored men upon equal conditions with white men. What are the popular objections to manhood suffrage, to such a measure as that proposed? Wuy they were worn threadbare, have grown state by repetition. We have been told that it makes the black man the social equal of the white man. Yet where the instance of a ballot ever levelling social disfinctions among white men. Education, wealth create the grades in society, and the bal-lot has nothing to do with it. We were told that pegro auflage would put the whites under the feet of the blacks. The numerical dispurity between the races renders such a contingency

preposterous. The practical advantages of es-tablishing equality of suffrage throughout the whole Union is that it will banish the "negro question" as the phrase is from the domain of politics. Give him the ballot, and then let him alone. Until that is done, there will be mobe. massacree, and all the enginery of bate ridi-cule and prejudice brought against him, while such persecution and sproscription will culist for him, on the other hand, the sympathics of common justice and common Give bim the ballot, and then let bim alone, to adopt his religious belief, marry, to acquire property, to vote, to exercise all the rights of citizenship and man. head with the same freedom that white men do, and then let him alone. The Fortleth Congres should address itself to this great work. will be the cap-stone of reconstruction. The people are ready, the time is ripe, the emergency also is urgent. In the strong and teres phrase of the Chicago Tribune "The political equality of all American citizens, and their right to the ballot as a means of defending their liberty should be asserted in the National Constitution, and be irrepealable by any State." And further "The adeption of the amendment can be ac complished between now and the first of May

next, and the work of the incoming adminis tration, and of Congress, and of the army, and of all the people, in making peace permanent, will be rendered easy and smooth. It will extinguish the last protense for disturbing reconstruction." The Washington Chronicle eays: "It can be done safely and successfully. Let us use it to float the ship of State into quiet waters - quiet because they are the great deep of justice and right." The Chronicle then proverds to show how the ground lies, the practicability f the ratification of such an amendment and the powerful canaderations which should induce

such action on the part of the Republican party it says: " We collate in tabular form the States in which colored men now vote; those now no constructed in which, when admitted, they will vote; and of the remainder those which be oug to us, and those which belong to the Dem ocracy. Every great political struggle in the history of this country has resulted in the triumph of radicallem. There have been three such n pregnant contests, in which the radical forces were successively lad by Jefferson, Jackson and Lincoln. We are yet in the hands of the latter. Every one of these great struggles has enlarge the houndaries of human freedom. As the lenders were true to human liberty, so far they were re offers a splendid attraction this evening, viz: successful. We may profit by blatory. Jeffer son, leading the forlors hope of true democracy, after a desperate struggle, planted He benner on our soil. Jackson, gathering around blm the erformance will conclude with the "Render." people, defended it from 1884 to 1896 against the one, or Love's Mysteries." It is a great bill, assemble of the alayeocratic oligarchy, headed by Calbonn. To-day it is our grand privilege to make firm and catabilish forever the fabric of Democratic liberty, grounding is on the sure and lasting foundation of universal entirage."

The Figher Brothers of Oil City, have struck a

new one hundred barrel well at Tidloute The new well on the Shamburg Petroleum Company's property, Upper Cherry Ron, owned by Lockhart & Frew, John Bates, W. H. Abbott and others, is now producing eighty barrels per day. It was struck recently.

The President Petroleum Company, ownleg lands near President on the Ailegheny river, have teased one thousand acres to Abram James, who struck the Harmonial well No. 1 at Pleasantiville. There are two or three wells in the vicinity of President which have been producing a few barrels per day for a year or two past, and from this it is certain that oil can be found in the vicinity, but the territory has not been sumclently tested to determine whether it will be of by great value or not.

The Allegheny Transportation Company will ommence pumping oil from the National wells nd vicinity by their new bipe line to Miller Farm or to Pathole, in about a week. There are now sixty-four thousand barrels of iron tankage

in course of erection at Miller farm. Through a misuaderstanding as to which di rection Cieveland oil in broad gauge cers was moved over the Oil Creek and Alleghens River Railway, we gaye the total of abipments to that place for October at 86,368 barrole of forty five gallons each, when they were actually 14,406 barrels greater. We were informed on what seem ed indisputable authority that all Cleveland of in broad gauge cars was moved during October by way of Oil City. Believing that this was true we did not take any account of Cleveland oil shipped on the foil Crook and fallegheny shipped on the foil to the foil to the fall was all moved by way of Oil City it would there be tallied at the Franklin Branch office, and the amount would be taken by us so the shipment to Cleveland. But it now appears that the oil shipped from Miller and Titusville was moved by way of Corry, and hence was not tallied at Oil City, nor did we get any account of it. This shipment reached 14 408 barrels of forty five gations each, and as this amount is to be added to the production during October, we make the necessary correction in 75 to 100 barrels, and increasing. the subjoined table which shows the total produc tion for October, the average per day, the pro-duction previously reported, and the average per day from January 1st to November 1st :

The Oil Regions of Pennsylvania.

Correspondence Rochester Union. Tirrsville, Pa., Nov. 11, 1868. Pleasantville has been the theme of correspon lents without number, and tales of the marvel ous wealth neuring out from within its borders have been published in different sections of the and; ony pligrims who had, it was thought, taken a long larewell of this delusive region have rushed bliker; the superfluous running gear of the country has been brought in to transport the rushing, gaping crowd; the only hote which for a long time the precinct could set its three and four dinners daily without satislying the hungry; and for a time it looked as though the days of '65 were to be lived over

Fortunately for all, especially for the travelers, the road from this city afforded excellent ac-commodations. Built is '65 to afford a says and

commodations. Built in '65 to afford a save and easy route to the far-famed "Pithole," the stockholders in the onterprise had the mortification of seeing the tide of travel de our as their road was completed, and until this Pleasantville fewer broke out there was no pleasure in it.

Since this raid began the road has been constantly thronged and the receipte very satisfactory. The city has respect largely of the advantages accruing from the large influx of atrangers, and business has doubtless been better for the past year than at any time since 'id. Real estate has advanced during the year at least fifty per cent, and evidences af prosperity abound. Although Pleasantville has been a favorite apot for oil operators, yet; there has been had it to foundation for some of the nunchausentias with which the press has been favored. It is all very well totel what this and that well pumps, but as an old vereing expresses it: "Boys, it isn't what ye pumps, it's what ye barrel as pays."

"Boys, it len't what ye pump, it's what ye barrel as pays."

A stranger is quite easily deceived in the matter of production. He hears that one well goes eighty barrels; another sixty barrels; another by actual measurement one hundred and sine barrels; another good for one hundred and fifty barrels; is assured there isn't a dry hole in the whole territory; that there are one hundred producing wells; he see about him twice as many more going down; and why shouldn't be telleve that even 3 000 bils were daily brought to the surface?

The panaces for all this trouble can be found in the "old reliable" report is the Moraina Harald of this city. These mouthly reports are compiled with the unmost care, free from the eccentricities of correspondents as eccentricities of correspondents, and regarded as they are, so the standard, they should be con-suited by all who desire to keep posted is of matters.

Iron tanks continue to shoot up at different points and afford a fair prospect of bolding any apare oil that may seek storage. Over one million barries of empty iron tankage arenow ready for use, and with the facilities for storage and the deliy increasing production, it is doubtful if oil reaches as low a figure as that of least winter. With oil at three doilars per batrel at the wells, business of all kinds is good. The Crittendem Rouse has been reopened, and all of the house are delog an increased business. HORDELT AT THE ESTPTONS BOUGE.

A gentleman named E. H Steever, who is stopping at the Keystone House, was robbed on Friday night last of three hundred and forty dollars in money and two valuable watches. The money and watches were in his vest and placed under the pillow when he retired, and vest and word extracted therefrom without awaking the owner. A large pocket book containing papers was also taken but was found the next morning seroes the street with the contents all right. As acon as the robbery was die a starch warrant was obtained from ustice Haight and Deputy Sheriff Curils see ed the boarders of the house without effect. No arrests have as yet been made and there is no clue to the thief. A good detective is needed at Pleasantville just at this time.

CORRECTION.

10 our report of the treet Luown as the Brown, fertig and Hammond tract, on Saturday, we were mistaken in saying that Brown Bros. are part owners of the tract. John B.own, of New York, John and Joseph Pertig and John Ham mond, are the owners of one half the tract, and Burtle Bros. of Titusville, are the owners of the other half. Brown Bros., of Pleasantville, have no laterest in the land.
